Elena Torres

Junior Full-Stack Developer | Python · Django · React.js · PostgreSQL

Hamilton, ON | elena.torres@example.com | (555) 010-0177 | etorres.dev | github.com/etorres-codes | linkedin.com/in/elena-torres-codes

SUMMARY

Full-stack developer with a Django and React.js app piloted by teachers and a freelance booking site handling about 40 bookings a month. Brings 7 years of teaching secondary math, including a Python grading tool that 5 other teachers adopted.

SKILLS

Languages: Python, JavaScript, SQL, TypeScript (coursework)

Frameworks: Django, Django REST Framework, React.js, Next.js, Node.js (coursework), Express (coursework)

Data & Tools: PostgreSQL, Git, Google Sheets API, Render, Docker (coursework)

Practices: automated testing with pytest, REST API design, code review on open-source pull requests

PROJECTS

QuizLoop · Django REST Framework, React.js, PostgreSQL · github.com/etorres-codes/quizloop

- Self-grading quiz app for teachers, piloted by 3 teachers with about 90 students in spring 2026; deployed on Render.
- Built the Django REST Framework backend and grading logic in a team of 2, with 85% test coverage in pytest.

Open-source contributions · Python

- 2 merged pull requests to an open-source Python quiz library: a timezone bug fix for due dates and a documentation fix.

EXPERIENCE

Freelance Web Developer · Self-employed · Hamilton, ON — *Feb 2026 – Present*

- Built a website and online booking form for Summit Tutoring Centre with Next.js, a small Django API, and PostgreSQL, replacing phone-only bookings; about 40 bookings a month now come through it.

Mathematics Teacher · Riverside Secondary School · Hamilton, ON — *Sep 2018 – Jun 2025*

- Wrote a Python tool on the Google Sheets API that auto-grades weekly Google Forms quizzes and emails students feedback, cutting grading time from about 6 hours to about 1 hour a week; 5 other teachers in the department adopted it.
- Designed a data-driven grouping plan for grade 9 applied math, run by the whole department; the pass rate rose from 68% to 81% over two school years (2022–23 to 2024–25).
- Founded and ran the school coding club, teaching Python and Scratch to about 20 students each year.
- Represented the math department on the school data team, working on attendance and grades dashboards in Google Sheets.
- Taught grades 9–12 mathematics to about 150 students a year.

EDUCATION AND TRAINING

Full-Stack Web Development (24-week full-time bootcamp) · Forge Coding Bootcamp — *Jul 2025 – Jan 2026*

B.Ed. · Eastbrook University — *2018*

B.Sc. Mathematics · Eastbrook University — *2017*
